DETAILED ACTION

Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose the combination of:

- a) position locators coupled to data storage means,
- b) processors with means of facilitating data transfer dependent on the authorization of locations of said data storage means,
- c) said processors with the means of modifying data transferred from a storage means by parsing the data to be transferred into constituents and randomly incorporating it into a set of irrelevant data having storage requirements that exceed those of original set of data to be transferred by a plurality of orders of magnitude.

Although the prior art of record discloses position locators coupled to storage devices that prevent unauthorized access to data by, in response to being aware of unauthorized access, preventing access or destroying data, said prior art does not disclose thwarting access by utilizing a process of parsing the original set of data into constituents and then randomly incorporating the parsed data into a larger set of irrelevant data as being recited in claims 1, 10, and 17. It is the combination of this process and the usage of position locators to detect authorized locations that is not taught by the prior art of record. Therefore, claims 1, 10, and 17 are allowed. Claims 2-9, 11-16, and 18-19 are allowed as being dependent upon allowed dependent claims 1, 10, and 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement for Reasons for Allowance".

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
